# TURBOLAB Launch Offer

All new smart high vacuum systems  
for researchers relying on vacuum

## Highlights

- Enhanced pump performance
- Compact mobile design
- Small foot print
- Easy to relocate pumps out and away from the frame
- Backlight display (control/monitoring/configuration)
- Monitored data are automatically stored to a data log file in the TURBOLAB. Users can easily view the log file with the TURBOLAB data viewer software tool or via the data viewer in the web server
- Covering more applications with a full range of high vacuum and dry or wet forevacuum pumps
- Benchmark turbostation offering dedicated ports for the connection of six different accessories and two gauges
- Benchmark functionality, reliability and design
- Prepared for worldwide voltage coverage
- Excellent price-to-performance ratio

Whatever you desire  
**Plug & Play**

\*All orders must be placed by December 31, 2016.  
Customer specific discounts do not apply.

All TURBOLAB systems from this launch promotion are equipped with DIVAC diaphragm pumps as backing pumps in a tabletop frame.

TURBOLAB are plug-and-play high vacuum pump systems based on well-proven components. Different configurations cover individual vacuum demands. Our TURBOLAB comes completely preassembled with turbomolecular pump, backing pump and the innovative TPU display power unit. The basic TURBOLAB can be upgraded with up to 6 accessories and 2 gauges.

**\*All orders must be placed by December 31, 2016.**

The prices stated are net exworks plus packaging and shipping costs as well as value added tax at the current rate. Customer specific discounts do not apply.

**Business terms:** the general business terms and installation guidelines of Oerlikon Leybold Vacuum GmbH apply. For our general business terms, see our web page. Our general business terms are available by mail upon request.
